

The New Release Portlet Will Provide Important Resources:

- Release Preview Date**
 - When your Release Preview/Demo environment will be ready. This Release Preview environment will be an exact copy of your Production Live environment, however with the new release features applied.
- Upgrade Date**
 - This is your scheduled **Production System Upgrade Date & Time**. On this date & time your NetSuite Production environment will become unavailable for a short period while they perform your upgrade.
 - Any Sandbox environments will be upgraded at the same time or just following your Production environment
- Sneak Peeks**
 - The Sneak Peeks page is a high level overview of key updates that will be available first in your Release Preview environment and then in your Production environment post upgrade. This is broken out by Feature highlights by industry.
- 2016.1 Overview**
 - The 2016.1 is a high level overview presentation of key updates that will be available first in your Release Preview environment and then in your Production environment post upgrade
- Release Notes**
 - The Release Notes PDF is a more depth description of all changes coming in Release 2016.1
- Release Preview Test Plan**
 - Documented details about the Release Preview environment including how to configure settings within the Preview Environment and how to Report Issues – if any are found.
 - They've also provided a sample Test Plan Template which you may use to design and complete test scenarios to validate critical processes within your NetSuite environment
- Release Preview Login**
 - Login link for your upgraded test environment for 2016.1
 - Login using your same username & current password as Production.
***Note:** if you've recently updated your Production password, you may have to use your previous password for this demo environment*
- New Release Training Videos**
 - NetSuite is currently conducting registered online training sessions which are recorded and added to their SuiteAnswers Learning Center. Be sure to check here often for newly posted videos!

New Release

Welcome to
Release 2016.1
39 days away

YOUR NEW RELEASE DATES:
Release Preview: N/A - N/A
Upgrade: 3/4/2016 8:00 PM PST - 3/4/2016 10:00 PM PST¹

Inventory and Order Management
Optimize order fulfillment for retailers and other product businesses with Automatic Location Assignment. Streamline data entry with Grid Order Entry for Transfer Orders. Track inventory Average Cost at a location group level, and maximize visibility and profitability using the Stock Ledger report.

[LEARN MORE](#)

Expanded OneWorld
Track global vendor relationships with ease using multi-subsidiary vendors with vendor merge support, and global vendor credit limits. Leverage the full financial management capabilities of multi-book in NetSuite OneWorld with per-book consolidation.

[LEARN MORE](#)

Custom Segments
Categorize and analyze your business data with unparalleled flexibility by using SuiteSegments, now generally available. Assign custom segments on any transaction, set values automatically on linked COGS and Revenue lines, and filter transaction reports by segment.
